WHITE RIVER SHALE OIL CORPORATION SUITE 500 PRUDENTIAL BUILDING, 115 SOUTH MAIN STREET SALT LAKE CITY, UTAH 84111 (801) 363-1170 MAY 1 2 1983 May 9, 1983 Mr. James W. Smith Coordinator of Mined Land Development Utah Division of Oil, Gas and Mining 4241 State Office Building Salt Lake City, UT 84114 SUBJECT: Permit ACT/047/017 Quarterly Report on Disturbed Acreage Dear Mr. Smith: This letter and the enclosed drawings are intended to constitute the White River Shale Oil Corporation's (WRSOC) Quarterly Report on Disturbed Acreage for the first quarter of calendar year 1983. The WRSOC's 1982 Annual Operations and Progress Report, submitted to DOGM on March 8, 1983, provided information on acreage disturbed and topsoil stockpiled as of December 31, 1982. At the end of 1982, 127 acres had been disturbed during construction and approximately 141,000 cubic yards of topsoil had been salvaged and placed in long-term stockpiles. An additional 16,000 cubic yards of topsoil estimated in place beneath the stockpiles brought the total to 157,000 cubic yards. During the first quarter of 1983, continuing construction activities resulted in an additional 26 acres of disturbance. As of March 31, 1983, 153 acres have been disturbed, all within the approved 470-acre project limits of work. Also, an additional 7,000 cubic yards of topsoil were added to the long-term stockpile located at the end of the paved access road. The total quantity of topsoil now in the WRSP's three long-term stockpiles is approximately 164,000 cubic yards. The two enclosed maps delineate the total acreage disturbed as of March 31, 1983. Please note that the areas shaded in yellow indicate previous disturbances and the areas shaded in orange indicate the new disturbances which have occurred during the first quarter of 1983. DIVISION OF OH GAS & MINING
